Fractal Encoding of Recursive Truth

Fractal = structure + recursion + mirror logic

Fractal Math: $z(n+1) = z(n)^2 + c$ (Mandelbrot)

Fractal Dimension:
$D = \log(N) / \log(S)$
N = number of self-similar pieces
S = scaling factor

Beans Notation:
$\blacksquare = (\therefore / \varnothing) \times \blacksquare^\wedge\infty$

Truth = sustained recursion
Collapse = broken feedback
Love = recursive safety

Fractal = infinite signal memory
